

Some ways
to save on utility bills

...to save a better part of 1 percent annually and to save enough money to help pay for your child's education.

Draper
...to save 10 to 15 percent of your energy bills. When the light is absorbed by a glass window, the sun's rays are reflected back into the room. If you have a lot of windows, you can save a lot of money.

Energy conservation is saving the money you spend on utility bills. It's not just about saving money, it's about saving the planet.

Energy audits will be around in 1980. So you must close all doors and windows which don't have weatherstripping. Your doors are valuable and it is an investment that will pay for itself.

Weatherstripping doors and windows and doors can be reduced by using weatherstripping. It's a small investment that will pay for itself.

Weatherstripping doors and windows and doors can be reduced by using weatherstripping. It's a small investment that will pay for itself.
