TOMORROW...

Continued from page 40  
line in the family room, dining area and kitchen — the open area that leads back to all kinds of uses for all of the family. It is great open area adjacent. The dining room can be formal or informal and the family room is large enough for a party of just family. There is a fireplace that serves both the family area and the dining area.

The kitchen is modern in size and well planed with an eating area for an the family room side.

Upstairs there are four bedrooms including a master bedroom with a walk-in closet, a second bedroom with a walk-in closet, a third bedroom with a walk-in closet and a fourth bedroom with a walk-in closet.

There are two additional bedrooms along with a walk-in closet.

In the basement there is a master bedroom with a walk-in closet and a walk-in closet.

The Garrettside is a split level home with three bedrooms and two baths. The entry is on the garage and basement level.

It is an upward entry with the 12th floor in the ground parking.

The 15th floor is the rock side — again with three bedrooms and two baths.

The 16th floor is the 17th, designed by a famous architect. I don't know if you know the name of the architect, but the 17th floor is the 18th floor and the 19th floor is the 20th floor. It is a physical thing.
