...tection device on the ...nt door is hardly ...ough," said Ginsburg. ...here are so many other ...cess points in a house ...t protecting one door ...s little or no value. All ...ors and windows acces...ble from the ground ...d ...len from street ...d be protected, ...cluding basement en...nces and garage ...rs."

THE HOMEOWNER, ... suggests, should select ... system which allows ...tting and disconnecting ... alarm only from vari...s points inside the ...use, thereby eliminat...g the need for outside ...arm keys. This, he said, ...inimizes the possibility ... a burglar being able to ...sconnect the system ...m the outside.

Ginsburg said special ...tention should be given ... any rooms containing ...luables such as art and ...welry. "These rooms," ... said, "are favorite tar...t areas of burglars and ...ould contain alarm de...ces of their own. The ...airway going to a bed...om area should contain ...condary protection as ...ll, to act as a trap in ...e event a burglar some...w gets past the outside ...otection."

The protection system ...ould also contain ...anic buttons" at select... points both in and out...de the house, he recom...ends. These buttons, ...hen touched, activate a ...ar... ...rm which may ...ti... the intruder. ...ns... ..., said the FBI re...orts fewer than one in ...,000 intrusions continue ...ter an alarm sounds.

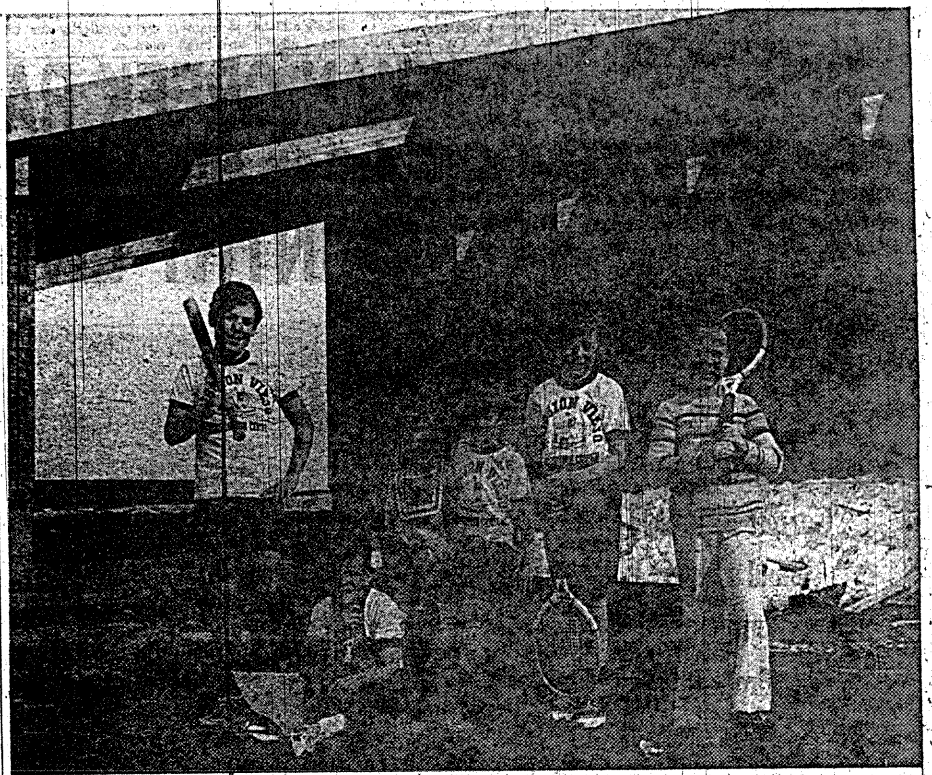
On the other hand, the ...stem could provide for ...lent panic operation if it ... connected to a nearby ...olice department. Once ...e panic alarm is trip...d, it should be resetta...

Ginsburg says, offers fire warning.

Heat detectors should ... sleeping area.

A loud sounding device ... possible in many communities—and advisable ... have the alarm company make this connection.

... ness Bureau and the police department.



IT WON'T BE LONG NOW...

...so please be a little patient, kids.

We're delighted to report that lots and lots of folks have recently come out to see the construction and the progress of the new Recreation Center at Mission Viejo. And of those we've had the pleasure to talk to, we're happy to report that they're as excited as we are.

You see, there's an awful lot here to be excited about. The new Recreation Center is rapidly nearing completion. When the doors are opened, the lucky residents of Mission Viejo will be able to join and enjoy such wonderful facilities as the year 'round indoor swimming pool, exercise room, sauna and Jacuzzi, professionally designed and maintained tennis and volleyball courts. Other indoor activities will include an adult lounge, pool, various activity classes and table tennis. Outdoors there will be picnic areas and tables, a croquet area and playground area and equipment for children.

The invitation to visit us is open to one and all, and we'd also like to have you see the homes at Mission Viejo. Here you'll find many delightful surprises. Mission Viejo homes are designed for spacious family living. There are such striking, innovative design ideas as vaulted ceilings, sunken conversation pits, masonry fireplaces, and an open balcony overlooking a formal dining room. There are all electric kitchens with pass-thru patio bars.

One and two story designs, some with basements ...starting at an unbelievably-low price of $30,495.

Mission Viejo is a planned, truly self-contained community. There will be shopping centers, Cherry Creek schools, parks, churches and businesses. There are plans, already completed, for a new Library and the Fire Station is under construction.

We hope you'll come out soon and see the friendliest, most exciting residential development ever conceived...anywhere.
